Receipts required for all warranty claims. Improper detent adjustment, low fluid level, failure to install new filter, broken front pump, improper installation, failure to replace front seal, and/or failure to flush system voids all warranties.
7. **ENGINES**-are warranted against excessive oil consumption, defects of internal parts, cracks in block or heads, and inadequate oil pressure. New radiator and oil cooler, timing belt, thermostat, oil seals, and gaskets must be installed before engine installation. New oil filter must be installed and engine oil must be replaced to manufacturer's suggested level. We do not guarantee against oil leaks. We do not guarantee against failure of other accessories installed on the new engine from the buyer's old engine. It is the buyer's responsibility to ensure the function of any and all accessories used on Sonny's Auto Salvage engines. It is the buyer's responsibility to ensure the transmission of the vehicle is functioning properly so it will not damage the engine. If the transmission is malfunctioning and damages the engine all warranties are voided. All engines and cylinder heads have heat tabs installed on them. If the vehicle begins to get hot the buyer must stop the vehicle and turn off the engine immediately. Failure to stop the vehicle and shut off the engine immediately will result in the engine overheating and will void all warranties. If the center of the heat tab is melted out, or the heat tab is missing or the engine is run hot under any conditions the warranty is void. Please check your parts for heat tabs before return.
