CSS **HEALTHCARE**

CSS is dedicated to protecting your employees by offering COVID-19 saliva rapid testing.

Highlighted features of this test include:

- **Collection is non-invasive, simple and scalable to large volume**
- <u>**FDA Emergency Use Authorization - (EUA)**</u> **issued on 5/7/2020 to Rutgers Clinical Genomics Laboratory (RCGL)**
- <u>**Yale University Study**</u> **showed saliva testing to be more sensitive than nasopharyngeal swabbed tests**
- **The RCGL saliva test is designed to detect RNA in the SARS-CoV-2 virus which causes COVID-19**
- **Collection chemistry inactivates 100% of the live virus in the sample while preserving the RNA for detection on testing**
- **Relative Sensitivity /True Positive Rate: 100%, Relative Specificity/True Negative Rate: 100%, Overall Accuracy: 99%**

Sign up TODAY! Quantities are limited and first-come, first-serve.

Please note: Onsite COVID-19 Saliva Testing requires a minimum of 20 tests per session
