

Beautiful skin for a lifetime

Environ skin care products have been formulated to combat the harmful effects of the harsh climatic changes of today's environment specifically pollution and the ever-increasing doses of radiation from the sun due to the thinning of the protective ozone layer. Added to these are the modern-day effects of social and work stresses and poor diet.

Everyday our skin loses vitamins, this aggravates the visible signs of ageing. Dr Des Fernandes, a prominent Cape Town plastic and reconstructive surgeon, was the first person in the world to introduce intense vitamin A treatment in high effective doses with startling results. This range established Environ as a world leader in skin care.

Environ products are developed as a result of Dr Fernandes' personal, scientific research. Environ skin care products are intended for use on all skin types and are based on a "step-up" or graduated system of varying intensities of active ingredients and vitamins to ensure that the client's skin adapts gradually. The Environ® products offer a definite regime to nourish, protect and maintain a healthy, youthful and beautiful skin. Each product is made from the highest quality ingredients. They are mostly free from fragrance, preservatives, colourants and animal extracts.

The key to the Environ formula is vitamin A, an addition that revolutionized the market when it was actually incorporated in the right dosages. As a plastic surgeon in Cape Town, Dr. Des Fernandes understood the importance of healthy skin for a person's overall appearance, and he set out to create the perfect skin care solution. Soon after, Environ hit the world by storm.

Vitamin A has a unique way of smoothing out a person's skin and protecting it from the harmful rays of the sun. The result is softer, more natural looking skin that seems virtually unaffected by the UV rays that often leave craters on a person's face. Collagen is restored through the use of vitamin A, and that combined with a regeneration of elastin makes skin look younger and healthier overall.

Environ replenishes skin's moisture from the first application, and it continues to protect the skin use after use. At its heart, Environ's® mission is to provide proven, cutting-edge technology and sound skin science principles in creating skincare for women and men from youth to maturity, as well as children, all skin types and ethnicities.
