

## Plastics Solutions

Plastics Solutions are a leading provider of many of the products that injection and blow molders need every day. Leading OEM manufacturers look to them to act as their sales partner both in North and Latin America as they have a history of delivering results.

Through a combination of on-line retail sales and an expanding sales agency network, Plastics Solutions are able to deliver to market the products that molders in the plastics industry require.

Established over 40 years ago under the trading name of Plastec USA, they quickly developed a reputation as a solid business partner who delivered results. Their portfolio of products quickly grew and they became the go-to sales agency group for American and European organizations looking to penetrate the plastics market in Latin America.

15 years ago they developed a catalogue and a website for selling a large variety of products that customers in the injection, blow and extrusion industries needed. "The one stop shop for all your plastics needs" was born.

Years of experience in importing and exporting, warehousing, direct and on-line sales means Plastics Solutions can deliver the quality products from leading suppliers that you need on-time and priced right. Plastics Solutions have expanded their offerings into the USA and Canada and are rapidly becoming a key supplier of innovation and technology as well as your daily MRO needs.

Visit [www.plasticssolutionsusa.com](http://www.plasticssolutionsusa.com) and start ordering what you need right away. While you are there, take a look at some of the other innovative products we offer...the ones you don't even know you need yet!

Thousands of solutions; one single source.
