

Kyäni Sunset™

Kyäni Sunset™ is the perfect combination of tocotrienols (the most impactful form of vitamin E) and omega-3s. This pioneering product uses pure annatto bush seed to harness the remarkable health benefits of tocotrienols. Additionally, Kyäni Sunset™ contains omega-3s derived from the Wild Alaskan Sockeye Salmon and Other Wild Alaskan Fish. The health benefits of tocotrienols and omega-3s are well documented by medical professionals and researchers. Paired together, Kyäni Sunset™ gives you and your family unmatched nutritional value.

Key Ingredients

Tocotrienols

The vitamin E family is divided into two categories—tocotrienols and tocopherols. Tocopherols are the most common form of vitamin E, but studies have found that tocotrienols are the most impactful due to their molecular structure. In addition, studies have found that tocotrienols promote heart health, proper blood sugar levels, and have so many additional health benefits.

Omega-3s

Omega-3s are an essential fatty acid required for optimal health. This healthy fat is found in every cell of the body, particularly in the brain and heart. However, the body doesn't produce these oils on its own—they must be obtained through diet. If you aren't consuming fish at least three times per week, doctors say you need to supplement with omega-3s. Kyäni Sunset™ contains extremely high levels of both EPA and DHA forms of omega-3s found in Wild Alaskan Sockeye Salmon and Other Wild Alaskan Fish.

Usage

Take 3 gel caps of Kyäni Sunset™ with dinner for optimal absorption and to allow the powerful tocotrienols and omega-3s to help restore your body during sleep. Use as a companion product with Kyäni Sunrise™ and Kyäni NitroFX™.

Storage

Store Kyäni Sunset™ out of direct sunlight in a cool, dry place before and after opening. Avoid extreme temperatures.

Shelf Life

Prior to Opening: 1-2 years
After Opening: 90 days
