

ADVANCED PEST SOLUTIONS
PREPARATION WORKSEET FOR RODENT TREATMENT

- _____ To the best of your ability, please move items away from the walls in basement.
- _____ Do not remove any evidence of rodent activity. Rodent dropping will aid your service technician's ability to determine areas to place rodent control equipment.
- _____ A complete inspection inside and outside of your home will be conducted by your service technician prior to trap placement. We will seal all rodent entry points that are ½" or less, excluding gaps under doorways & garage doors. Your service technician will point out any areas of the exterior of your home that need to be repaired by a carpenter. Our office has a list of reliable carpenters that have done work for us in the past.
- _____ Because of the many circumstances which remain out of our control concerning structural issues with the exterior of your home, we do not offer any warranties for rodent control.
- _____ After this treatment is performed, you may want to consider our Quarterly insect and rodent control program. Our office staff will give you a courtesy call in about one month to see if you would like to begin this program.
- _____ With the Quarterly program you will be given a full 90 day warranty for both insects and rodents. The price for Quarterly service to your home will be \$_____, if you are interested.
