

UNIQUE

WOOD CREATION

Custom Cabinetry

Whether there's a new kitchen in your dreams, a bathroom remodel in the works, or you're in need of some custom woodwork and trim in an area of your home, we're excited to help! Our goal is to provide you with cabinetry and custom woodwork that not only looks great (that's the obvious part), but is also functional and a joy to experience.

Just as important, (or more?) is quality construction in the obvious and not so obvious areas. Details like dovetailed drawer boxes, using solid wood components where possible, and time proven construction methods give your project what it needs to endure the rigors of daily use. Whether your whipping up meals, baking for the family, enjoying a little personal time, or simply connecting with the loved ones in your life, worrying about the durability of your cabinetry shouldn't be something you need to think about.

The best part? All this is completely customizable to your unique situation. Whatever your space, we can build to fit. Bring us your challenges and dreams...kitchens, vanities, libraries, bar areas, bookcases, mantels, trim, etc., we're ready to create! And for your inspiration, here's some examples in our satisfied customers homes!

Akron, Pennsylvania

Constructed of Maple wood with Nutmeg stain on the wall runs and Georgian paint with Warm Brown Glaze on the 72" Island. Laminate counter tops finish off this Cambridge line kitchen for a warm and cheery living space.

Pull out above refrigerator

Millwork above windows

Pull out cutting board

Under cabinet lighting

Master Bath & Mud Room

Cambridge line cabinets in maple featuring marble tops in the master bath.

Fair Hills, Maryland

Homestead line cabinets in Maple wood with Seely stain and Portabella glaze dress up an 18th century farmhouse remodel. Featuring a Maple Butcher Block Top on the Island and dual pantries with pullouts on either side of the refrigerator cabinet. Matching Maple vanities in bath and powder room(opposite).
