Course Descriptions & Rates

HealthSav LLC™ is an Authorized American Heart Association Training Center

HealthSav LLC™ is an American Heart Association Training Center and will ensure that your training will be the highest quality training available. Whereas many CPR instructors only teach a couple of courses a year to retain their teaching credentials, at HealthSav LLC™ we teach upwards of 20 courses a week. We know how to best develop your skills and make you comfortable so that when you leave our course you will be comfortable with being able to assist a person in need. We maintain a supply of key ring faceshield devices and different styles of pocket masks and they are all available at the classes for purchase. Course rates below include the AHA course manual except for the BLS Recert course and online courses. If a student brings the correct manual with them to the course (BLS & Heartsaver AED) we will credit them \$15 off of the cost of the course.

Cancellation Policy: Any cancellation must be given at least 48 hours in advance. Failure to provide this notice will result in a full charge for the missed course. Group bookings must be canceled no less than 2 weeks prior to the course date. We take credit cards (Discover, Visa and MasterCard & AMEX).

BLS for Healthcare Provider (BLSHCP) classes are \$120 (6 hours scheduled) and include the AHA course manual and a 2 year certification card. Group rates are \$600 for a class of 6. A group of 12 would be \$1100 and also includes the course manual and 2 year certification card. Group courses can be at your location or ours. This is a class required for EMS, lifeguards, physical therapists, nurses & doctors and is the most in depth CPR class offered. Use of a Bag Mask, advanced airway techniques and concentration on 2 rescuer CPR are some of the additional features of this class along with comprehensive Adult, child and infant CPR, adult, child and infant choking and full hands on practice sessions with an AED (Automated External Defibrillator). AHA E Learning options are also available for any BLS Student should you want to use that process. The AHA BLS E Learning with classroom skills practice and testing is \$95 (see below)

E Learning Either the Basic Life Support for the Healthcare Provider, Heartsaver CPR AED as well as the combined Heartsaver AED CPR/First Aid courses are now available as E-Learning courses from the American Heart Association. Beware of bogus websites that portend to supply you with online certifications. These will not be accepted in places that require certification. The AHA Blended E Learning differs in that you are actually taking the course via the American Heart Association website and then coming to our site to practice and then be tested on your practical skills. HealthSav LLC™, as an AHA Training Center, can provide you the key code access to this web site where you learn all the cognitive elements of your CPR course in your own time frame. That is Part 1 of the process. The Key Code to access the AHA site will be e mailed to you automatically upon registration of the course. Parts 2 & 3 are about a 1-2 hour session with HealthSav LLC™ where you first practice on a manikin (Part 2) and then test out (Part 3). The e learning process requires the student to come in for parts 2 & 3 prepared to take the skills test in the allotted time. Upon completion of the skills session you will be issued your certification. The BLS course is \$95 and Heartsaver CPR AED \$85 which includes the key code for Part 1 and the skills session (Parts 2 & 3). The e learning modules will be available to the student for 24 months after the issuance of a certificate.

ACLS

HeartCode is an AHA Web-based, self-paced instructional program that uses eSimulation technology to allow students to assess and treat patients in virtual healthcare settings. Course completion consists of 3 parts: the computer-based cognitive portion (Part 1), the skills practice portion (Part 2), and the skills testing portion (Part 3), which can be completed on a voice-assisted manikin (VAM) system. Skills testing must be completed within 60 calendar days of completing the computer-based cognitive portion, indicated as the completion date on the certificate.

Heartcode ACLS requires prior knowledge that will be applied in using the ACLS treatment algorithms. Unprepared or inexperienced students may require additional time to complete HeartCode ACLS. To be successful in any ACLS course, students should be able to identify ECG rhythms and should know pharmacology specific to cardiopulmonary arrest and other cardiopulmonary emergencies *before* beginning the course. It is strongly recommended that students review the ACLS course materials contained within the program and complete the Precourse Self-Assessment prior to attempting the patient cases. The cost of the ACLS online access and the in classroom skills practice and testing is \$225.00

BLS Instructor Course This course is designed to prepare the instructor candidate to be able to teach all AHA BLS courses from Family and Friends through Basic Life Support for the Healthcare Provider. All instructor candidates must complete the AHA Instructor Essentials course online prior to our in class BLS Instructor course and must also be current with their own AHA BLS For Healthcare Provider certification. Upon completion all candidates must affiliate with an AHA Training Center and follow all AHA instructor protocols. HealthSav™ will be available to consider instructors for inclusion into its Training Center. The course includes an instructor kit containing manuals & stopwatch. The cost of the BLS Instructor course is \$275.00 and will be done over a scheduled 9 hour day with a break for lunch. The cost of the course also includes the Instructor Essentials access code which will be sent to each instructor candidate upon registration.

BLSHCP Recertifications are \$95 (4 hours scheduled) for renewing an expiring or expired BLSHCP certification. You must present your Healthcare provider card or equivalent at the class in order to be able to take this renewal course. Cards expired for more than 2 months require you to take the full course. Group rates are \$950 for a class of up to 12 people which can be at your location if you prefer. A class of 6 at your location or ours would be \$525. E Learning options are also available for any BLS renewal student.

Heartsaver CPR AED classes are \$85 (5 hours scheduled) and include the AHA course manual and a 2 year certification card. Upon completion you will be certified in adult, child and infant CPR along with how to handle choking situations for adults, children and infants. You will also receive full certification for using an Automated External Defibrillator (AED). Group rates are \$850 for a class of up to 12 people which can be at your location if you prefer. A class of 6 at your location or ours would be \$475. This class is great for those who want to know all there is to know about CPR, choking and the AED without some of the more technical aspects provided in the Healthcare provider course. This class is great for those outside of the medical profession or those in the medical profession that do not require the Healthcare Provider level class. Police, fire, teachers, personal trainers, home care aids and the general lay public are well served with the Heartsaver AED class.

Host a Heartsaver AED group (minimum group size is 6 people) and be the 7th and get your certification for free! If you have a class for 12 we will include 2 additional people (14) at no extra cost. Online options are also available for any Heartsaver AED student.

Basic First Aid classes are \$65 (4 hours scheduled) and include the course manual. Upon completion you will receive your First Aid certification which is good for two years. The course is very extensive and will cover many aspects of basic first aid including bleeding (internal as well as external), burns, environmental incidents, allergy and breathing problems, heart attacks, shock and much much more. This course is great for the layperson or the healthcare provider. It is highly recommended that any Heartsaver CPR/AED student add this course to their regimen. Group rates are \$650 for a class of up to 12 people which can be at your location or ours. A group of 6 would be \$375 .

Heartsaver First Aid / CPR AED classes are \$135.00 (9 hours scheduled with lunch break) and include the AHA course manual. The completion of this course will certify the individual for 2 years in CPR/AED and First Aid. This is a very extensive course that combines the elements of the individual Heartsaver CPR AED and Basic First Aid courses listed above.

Family & Friends CPR is \$65 (scheduled for 3.5 hours) and includes the course manual but no written certification is issued. The course covers adult, child and infant CPR along with how to handle choking situations for adults, children and infants. AED's will be discussed but not practiced as they are in Heartsaver AED certified courses. Group rates are \$650 for a class of up to 12 people which can be at your location or ours. A group of 6 would be \$375 and a group of 12 would be \$650. This class will completely enable the student to have full understanding and capabilities of CPR for adult, children and infants as well as how to deal with choking situations for adult, children and infants. This class is great for those that just want a basic CPR class that does not include the use of a defibrillator. Young teens involved with babysitting are well suited for this class. This class will run between 3 and 3.5 hours.

Pet First Aid & CPR is \$65 and scheduled for 3.5 hours and includes a course manual and 2 year certification through The American Safety and Health Institute. The course will cover canine First Aid and CPR and then the differences that exist for felines. Practice on a Canine Manikin will take place for CPR compressions and breathing techniques.

The American Heart Association strongly promotes knowledge and proficiency in BLS, ACLS, and PALS and has developed instructional materials for this purpose. Use of these materials in an educational course does not represent course sponsorship by the American Heart Association. Any fees charged for such a course, except for a portion of fees needed for AHA course materials do not represent income to the Association.
