## What you can expect during an office visit?

If you are new to us, we will be asking you to fill out a short form that will provide us with information about your hearing health history. We will also be completing a comprehensive hearing examination. This examination helps us to diagnose your hearing loss and assists in determining recommendations based on your individual needs.

## Do you need a referral?

Many health care insurance companies require a referral from your physician for testing.

Please call the number on your insurance card to determine if you need a referral prior to your hearing evaluation. We can also help you with obtaining information regarding referrals and hearing aid insurance benefits.
