

### Valley DropSpan™

The Valley DropSpan™ utilizes custom structural components and allows the outer spans of your center pivot to be “dropped” from the machine, allowing you to pick up additional acres adjacent to large obstructions at the edge of the field. The spans can be dropped or re-attached by one person without tools in less than 15 minutes.

### Features

- Large platform for easy access
- Optional second end gun
- Large, easy-to-access coupling with tethered plug
- Simple electrical connector manages span cable and control logic; no rewiring needed
- Simple winch and batten leg system to drop and re-attach outer spans
- Stop switch automatically aligns base machine with dropped spans for easy re-attachment

### Valley Benders

The Bender options were introduced to maximize irrigated area at a low cost. Benders allow the outer portion of a pivot to continue moving while the inner portion is stopped by fences, trees, or other obstacles. With Valley Benders you receive improved water application while maximizing your irrigated acres.

#### Bender30™

- Easy retro fit - no structural changes required
- Bends up to 30 degrees in either or both directions

#### Bender160™

- Utilizes custom pipes and swivel
- Bends up to 160 degrees in either or both directions

### Features:

- Pick up additional acres on part-circle machines at a low cost
- Multiple bends per machine are allowed
- Optional valves shut off the water to stopped spans while bending
- Valley exclusive speed-up timer improves water application performance while bending
- Integrated backup safeties prevent the machine from over extension and ensures return to normal operation after bending
