Q. What do you do when a client calls to tell you that they have water, smoke or mold damage?

A. Request a free inspection from Flood Pros Before the claim is filed!

FLOOD PROS — A Restoration Company that is More FOCUSED on Drying.

Some restoration companies are actually construction companies, and are more focused on tear out and reconstruction rather than on drying and saving.

Drying water-damaged homes and businesses is very important. Drying them fast is critical! The longer it takes to dry a water damaged building, the more expense and damage increase. Drying a building fast helps to eliminate or greatly reduce the damage and expenses. New research shows that delivering heat and containing it to the water-

saturated materials will dry the same damage in less time than conventional drying methods.

Testimonial

"Incredible Service, fast response and friendly crews. They saved us 10's of thousands of dollars of damages by their immediate response in the middle of the night. We highly recommend Flood Pros to anyone in need.

JBLH Properties

The **FLOOD PROS** method of Directed heat drying forces a high volume of heat directly to the water-saturated area, rapidly evaporating the water. The vapor is then eliminated with air evacuation and dehumidification. All this boils down to real dry, real fast. That means less damage and less money lost.

SMARTER DRYING:

**Less Tear Out
Means Less Rebuild
Which Equals Less Loss**

FREE PRELIMINARY INSPECTION BEFORE A CLAIM IS FILED !!

Locally owned and operated you can rest assured your policy holder will experience service that is second to none!!

PREVENT SUB-PUMP FAILURES: HOMEOWNER TIPS

- 1. Pumps should be checked yearly.**
- 2. Make sure discharge line from sump-pump is not frozen or clogged with dirt or debris.**
- 3. Overwhelmed pumps: Might be too small, sometimes single pumps is not enough. Severe Weather could overwork pump.**
- 4. Pump Burn Out: Faulty float switch or underpowered pump. Remember cheap pumps are made with cheap parts!**
- 5. Power Outages: Battery Operated Backup when a storm takes out power.**

Smoke Fire Water Mold

The Bennett Family and staff have dried out thousands of homes. You can be rest assured that by referring Flood Pros, you are referring a company that cares. We have been providing services to our community since 1992.
