### Spotlight on Digital Signage at the Rio Olympics

By Zoe Mutter for [AV Magazine](#) 08/11/2016

In terms of scale, there's really nothing more massive than the Olympics. The sheer volume of athletes and spectators is overwhelming. To further complicate matters, from a geographic perspective Olympic events are often separated by many miles. Of course this presents some challenges in terms of how organisers deliver content to the spectators, and digital signage paired with a reliable and effective network management solution ...
