John Caballero Lic #9589  
Michael Caballero Lic #9819

## Caballero & Sons wishes you a Happy New Year!

If you think you have a frozen/burst pipe call a licensed plumber. If you locate the frozen section of pipe and try to thaw it yourself, be sure to take the following precautions to protect yourself and your property: Do not use an open flame. You risk setting your property on fire, and overheating one area can cause the pipe to burst. Place a warm towel or rag around the pipe.

Watch your water pressure this time of year! The first sign of a frozen pipe is restricted water flow. If you notice this, be sure to act quickly and call a professional.

## HAPPY NEW YEAR

Do you know where your main shut off valve is? Does it work? When was the last time you had it checked? In case of an emergency be sure you know where your main shut off is & that it is in working condition.
